

Deliver Your Production On Time

ThruPut
Manager®
Automation
E D I T I O N 6

Automated production workload management that makes the most of the available batch window.

Performance Highlights:

- ❑ Interfaces with CA 7 Workload Automation to capture your scheduling priorities, dependencies and deadlines.
- ❑ Continuously recalculates the production critical path as workload progresses.
- ❑ Proactively controls the production queue and initiators to prioritize job execution.
- ❑ Controls tape drive access and dataset contention in accordance with CA 7 priorities.
- ❑ Eliminates interference from non-production workload through dataset fencing and enforcing of job classing standards.
- ❑ Keeps Production Control staff informed with consolidated JES2 and CA 7 displays and enhanced alerts.

TM/Production Control Services™ works in conjunction with ThruPut Manager and CA 7 to automate your production workload and control the resources. Your production schedule is met and you get the most out of CA 7 Workload Automation.
