

MODERNIZE YOUR PRODUCTION CONTROL

EXTEND YOUR CA 7® GOALS TO z/OS WITH

ThruPut
Manager AE
with **PCS**

PCS

ThruPut Manager AE with PCS works with CA 7 Workload Automation to modernize your Production Control environment.

OPTIMIZE BATCH EXECUTION

- Prioritize z/OS processing based on critical path calculations and your CA 7 schedule.
- Eliminate interference from lower importance and non-production work.
- Favor more important work and automatically escalate when necessary.
- Increase throughput and complete your batch window earlier.

SIMPLIFY PRODUCTION CONTROL

- Free up Production Control staff from constant monitoring and micro-managing of the production workload.
- Use consolidated displays for quick access to enhanced status information.
- Deploy customized alerts to anticipate problems.
- Reduce CA 7 database maintenance.

THE LEADER IN END-TO-END BATCH AUTOMATION

ThruPut Manager AE is a radical leap in datacenter automation technology. It delivers year-on-year datacenter savings while simplifying the datacenter environment and enhancing service to batch users.

SIMPLICITY • SERVICE • SAVINGS
